Software Engineer Frontend

PARTICULAR REQUIREMENTS ARE:

- 3+ years in JS (particularly Angular 7+) development;
- Understanding of CSS preprocessors (SCSS);
- Strong knowledge of JavaScript/Typescript;
- Strong understanding of REST architecture;
- Experience in using NgRx, RxJS;
- Strong knowledge of Reactive forms in Angular;
- Ability to keep high code quality via code reviews, unit tests, and integration tests;
- Experience with Git;
- Understanding of Software Development Lifecycle and CI/CD concepts;
- Excellent technical, written, verbal, interpersonal communication skills.

IT WILL BE A PLUS:

- Experience with Webpack, Jira;
- Knowledge Vue.js or Nuxt.js;
- Experience with Lerna or Nrwl Nx;
- Experience with Firebase.

RESPONSIBILITIES:

- Designing and developing user interfaces using Angular best practices;
- Develop new features from scratch;
- Do effective and precise code reviews;
- Writing unit tests;
- Working independently and in the team to tackle difficult problems and implement timely solutions;
- Communicating effectively within and across teams during design discussions;
- A pragmatic approach to engineering. Remove technical roadblocks by identifying areas of complexity and suggesting architectural improvements that increase performance and lower risk.

TECH STACK:

- Angular 7+;
- NgRx 7+, RxJS 7+;
- Vue.js 3+, Nuxt.js 2.15+;
- Nrwl/nx 13+.

We Work Hard And Party Hard, Making This World A Better Place! We Exhibited And Pitched This Year At Tech Crunch Disrupt SF And Going To Rock The World Next Year ;)
